

Hey Smack,

I was drifting around a car dealer sporting my better mileage than every car on the lot to the sales guys. So I got talking and they gave me a free emissions test with booster on and off and I got awesome results. They are in the attached files. This is proof to myself and if you need numbers to back the emissions claims here they are. This was a 1997 Chevy Malibu 3.1L V6. I just ran these tests today. The O2 readings on some of the tests are way out of whack, that's because all extra water coming out went into the probe and confuse it. I was told all the other data shouldn't be affected by that.

Jay

No Load Emissions Report
Test Date/Time: 07/08/2008 @ 10:31:20 AM
